TISDALE RESOURCES CORP.
MANAGEMENT DISCUSSION & ANALYSIS
For the Six Months ended June 30, 2021

The following Management's Discussion and Analysis ("MD&A") for Tisdale Resources Corp. ("Tisdale" or the "Company"), prepared as of August 18, 2021, for the six months ended June 30, 2021 should be read in conjunction with the unaudited consolidated interim financial statements and related notes of the Company for the six months ended June 30, 2021 and the audited consolidated financial statements and related notes of the Company for the year ended December 31, 2020. The financial statements have been prepared using accounting principles consistent with International Reporting Standards (IFRS) as issued by the International Accounting Standards Board ("IASB"). All monetary amounts in this MD&A and in the financial statements are expressed in Canadian dollars unless otherwise stated. Additional information on the Company can be found on SEDAR at **www.sedar.com**. The reader should be aware that historical results are not necessarily indicative of future performance. The consolidated financial statements together with the following MD&A are intended to provide readers with a reasonable basis for assessing the financial performance of the Company.

Forward-Looking Information

Information set forth in this MD&A may involve forward-looking information under applicable securities laws. Forward-looking information is information that relates to future, not past, events. In this context, forward looking information often addresses expected future business and financial performance, and often contains words such as "anticipate", "plan", "estimate", "expect", and "intend", statements that an action or event "may", "could", "should", or "will" be taken or occur, or other similar expressions. All statements, other than statements of historical fact, included herein including, without limitation; statements about the future expenditures and capital needs of the Company and the future exploration on, and the development of, the Company's projects are forward-looking information. By its nature, forward-looking information involves known and unknown risks, uncertainties and other factors which may cause the Company's actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking information. Such factors include, among others, the following risks: the need for additional financing; operational risks associated with mineral exploration; fluctuations in commodity prices; title matters; environmental liability claims and insurance; reliance on key personnel; the potential for conflicts of interest among certain officers, directors and promoters with certain other projects; the absence of dividends; competition; dilution; the volatility of the Company's common share price and volume and the additional risks identified in the "Risk Factors" section of this MD&A, and other reports and filings with applicable Canadian securities regulations.

Forward-looking information is in addition based on various assumptions including, without limitation, the expectations and beliefs of management, the assumed long-term price of commodities; that the Company can access financing, appropriate equipment and sufficient labor and that the political environment will continue to support the development and operation of mining projects. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking information. Accordingly, readers are advised not to place undue reliance on forward-looking statements. Forward-looking information is made based on management's beliefs, estimates and opinions on the date that information is given and the Company does not intend to update forward-looking statements or information, except as may be required by applicable law.

Description of Business and Overview

The Company was incorporated in the Province of Ontario and continued into the Province of British Columbia and is listed on the TSX Venture Exchange (symbol: “TRC”). Its principal registered and records office is located at 2200 - 885 West Georgia Street, Vancouver, B.C. V6C 3E8.

The Company is in the business of acquiring, exploring and evaluating mineral resource properties, and either joint venturing or exploring and evaluating these properties further or disposing of them when the evaluation is completed. The Company is a development stage company and has produced no revenues to date and is reliant on the issuance of shares to finance continued exploration activities and operations.

On August 24, 2017, the Company closed its fully subscribed financing, by issuing 48,077 common shares, at a price of $52.00 per share, for total gross proceeds of $2,500,000.

On September 13, 2017, the Company completed the acquisition of the right to acquire the Carter Lake Uranium Project through the purchase of Gunnar Minerals Corp. Following completion of the acquisition, Gunnar has become a wholly owned subsidiary of the Company. In consideration for the acquisition of Gunnar, the Company paid $0.227 per share for the 7,500,000 outstanding common shares of Gunnar, which includes a $100,000 commitment fee advanced to Gunnar in June 2017. As of closing of the acquisition, the Company has paid a total of $1,700,000 (including the commitment fee) as purchase consideration.

On November 24, 2017, the Company acquired Keefe Lake Projects Inc. (“Keefe Lake”). Subject to existing royalty rights, Keefe Lake Projects holds a 100% interest in the Keefe Lake Uranium Project, an advanced exploration project that covers an area of approximately 15,400 hectares, on the eastern side of the Athabasca Basin, in Northeastern Saskatchewan, Canada. Pursuant to a purchase agreement entered into by the Company, Keefe Lake and its shareholders, Urania Resource Corp. and Doctors Investment Group Ltd., whereby the Company acquired all of the issued and outstanding share capital of Keefe Lake for 152,500 common shares of the Company valued at $2,867,000 or $18.80 per common share issued.

On November 14, 2018, the Company consolidated all its issued and outstanding share capital on a one-new-for-four-old basis. The name of the Company was also changed to Tisdale Resources Corp. on the same date.

On December 3, 2018 the Company completed a non-brokered private placement by issuing 55,000 units at a price of $2.00 per unit for gross proceeds of $110,000. Each unit consists of 1 common share of the Company and 1 common share purchase warrant entitling the holder to acquire a further common share of the Company at a price of $2.60 per share for a period of twenty-four months.

On December 3, 2018 the Company's board of directors was reconstituted to consist of Richard Grayston, Marco Parente, Mark Ferguson and Richard Ko. Mr. Grayston was appointed President, CEO and Corporate Secretary of the Company, and Mr. Ko as CFO.

On December 6, 2018 Mr. Parente resigned as a director of the Company.

On May 1, 2019, Alex Klenman was appointed to the board of directors and assumed the role of CEO, filling the position previously held by Richard Grayston who passed away.

On July 7, 2020, the Company granted 43,000 incentive stock options to consultants of the Company. These options vested immediately and are exercisable at $0.65 per share for a period of three years, expiring July 7, 2023. On July 21, 2020, the Company issued 43,000 common shares pursuant to the exercise of these share options for gross proceeds of $27,950.

On September 24, 2020, the Company consolidated all its issued and outstanding share capital on a one-new-for-ten-old basis. Following this consolidation, the Company had 1,135,350 common shares outstanding. All figures as to the number of common shares, stock options, warrants, and loss-per-share in this MD&A have been retroactively restated to reflect the consolidation.

On January 27, 2021, the Company raised gross proceeds of $355,200 by way of a non-brokered private placement of 740,000 units issued priced at $0.48 per unit. Each unit consists of one common share and one common share purchase warrant with an exercise price of $0.60 and has an expiry date of three years.

On August 17, 2021, the Company closed the first tranche of a non-brokered private placement and issued 1,850,000 units at a price of $0.44 per unit for gross proceeds of $814,000. Each unit consists of one common share and one non-transferable share purchase warrant. Each warrant entitles the holder to purchase one common share at a price of $0.55 until August 17, 2026. No finders' fees or commissions were payable in connection with this financing. A total of 225,000 units were issued on a flow-through basis.

Exploration and Evaluation Projects

Ownership of mineral property interests may involve certain risks due to difficulties in determining the validity of certain claims as well as the potential for problems arising from the ambiguous conveyancing history characteristic of some mineral properties. The Company has investigated ownership of the mineral properties in which it has an interest and, to the best of its knowledge, all properties are in good standing.

It is the Company's policy to expense exploration and evaluation expenditures as incurred.

Carter Lake Uranium Project, Southwestern Saskatchewan

On September 13, 2017, the Company entered into a share purchase agreement with Gunnar Minerals Corp. ("Gunnar") pursuant to which it acquired 100% of the shares of Gunnar in consideration for a cash payment of $1,700,000. Gunnar holds the rights to acquire the Carter Lake Uranium Project, located in the southwestern corner of the Athabasca basin, Saskatchewan after signing an agreement with Doctors Investment Group Ltd. ("Doctors") to acquire 100% interest in and to the property on April 8, 2017. The project covers approximately 1,113 hectares on the Carter Lake corridor. The Carter Lake uranium project is subject to a 2% net smelter return royalty, one-half of which can be purchased in consideration for a cash payment of $2,000,000.

In consideration for the grant of the right to purchase 100% undivided interest in the property Gunnar shall pay:

- $100,000 in cash within 5 days of Gunnar entering into an assignment or other material agreement for an interest in the property with an issuer with shares trading on a recognized stock exchange but in any event no later than 90 days after the signing of this agreement (paid July 5, 2017);

- A further $100,000 in cash and completing no less than $250,000 in qualified exploration expenditures on the property on or before April 8, 2019 (unpaid);

- A further $100,000 in cash and completing no less than $500,000 in qualified exploration expenditures on the property on or before April 8, 2020 (unpaid);

- A further $100,000 in cash and completing no less than $1,000,000 in qualified exploration expenditures on the property on or before April 8, 2021; and

- At Gunnar's election cash payments can be paid to Doctors in lieu of completing qualified exploration expenditures on the property.

The project covers approximately 1,113 hectares on the Carter Lake corridor, an exploration zone adjacent to the prolific Patterson Lake corridor, which hosts two of the most significant uranium deposits in the basin: Nexgen's Arrow deposit and Fission's Patterson Lake South deposit.

On September 17, 2017, the Company commenced its phase 1 radon gas survey and completed the deployment of Alpha-Track radon gas sensors in an array over the Carter Lake conductive zone, which was previously identified through a VTEM (versatile time domain electromagnetic) (magnetic/EM) survey, performed by ESO Uranium Corp.

On October 4, 2017, the Company delivered 158 radon cups to Alpha-Track Uranium Exploration Services for assay. On November 7, 2017, the Company completed its initial interpretation of radon gas results. The results confirmed that the highest concentrations of radon gas observed in the 2017 programs strongly correlated with the faulting in the subsurface sandstones and with electromagnetic conductors interpreted through both ground and airborne geophysics. This strong correlation suggests that the radon gas at Carter Lake is likely the result of a subsurface radioactive source. As such, the Company's exploration team intends to undertake a highly detailed diamond drilling plan to test the project.

The results, which ranged from a high of 29 tonnes per square millimetre to a low of less than one tonne per square millimetre, suggested that both the Carter Lake target zones host anomalous concentrations of uranium. Anomalous radon gas, which is a product of uranium decay, gives a direct correlation to the presence of subsurface uranium.

The Company has elected to terminate its option to acquire the Carter Lake Uranium Project.

Keefe Lake Projects, North-eastern Saskatchewan

On November 24, 2017, the Company acquired Keefe Lake Projects Inc. Subject to existing royalty rights, Keefe Lake Projects holds a 100% interest in the Keefe Lake Uranium Project, an advanced exploration project that covers an area of approximately 15,400 hectares, on the eastern side of the Athabasca Basin, in Northeastern Saskatchewan, Canada. The project is on trend with the McArthur River, Cigar Lake and Key Lake mines, three of the largest and richest uranium mines in the world. The Keefe Lake exploration model is a shallow basement or sandstone-hosted uranium deposit, with average basement depths of only 170 meters. Since 2012, the project has been subject to over $4,000,000 in exploration expenditures, including airborne geophysics, 2-D seismic and diamond drilling.

The Company intends to use proceeds from financings completed in 2021 to complete a ZTEM survey of the primary target at the Keefe Lake Project.

Acquisition of Subsidiaries

Gunnar Minerals Corp.

On September 13, 2017, the Company completed the acquisition of the right to acquire the Carter Lake Uranium Project through the purchase of Gunnar Minerals Corp. (“Gunnar”). Gunnar holds the right to acquire a 100% interest in the Carter Lake Uranium Project.

Following completion of the acquisition, Gunnar became a wholly owned subsidiary of the Company. In consideration for the acquisition of Gunnar, the Company paid $0.227 per share for the 7,500,000 outstanding common shares of Gunnar, which includes a $100,000 commitment fee advanced to Gunnar in June 2017. As of closing of the acquisition, the Company has paid a total of $1,700,000 (including the commitment fee) as purchase consideration.

The Company was considered the acquirer, and Gunnar was considered the acquiree in the transaction. Gunnar was incorporated in April 2017 and did not constitute an operating business; therefore, the transaction was not accounted for as a business combination under IFRS 3. The consideration paid in excess of net liabilities acquired was expensed to exploration expenditures.

The following table summarizes the consideration paid and the fair value of the identifiable liabilities assumed as of the date of acquisition:

Cash paid	$	1,700,000
Total consideration paid		**1,700,000**
Liabilities		(1,164)
Total value		**(1,164)**
Exploration expenditures	**$**	**1,701,164**

Keefe Lake Projects Inc.

On November 24, 2017, the Company acquired Keefe Lake Projects Inc. (“Keefe Lake”). Pursuant to a purchase agreement entered into by the Company, Keefe Lake and its shareholders, Urania Resource Corp. and Doctors, whereby the Company acquired all of the issued and outstanding share capital of Keefe Lake 152,500 common shares of the Company. The shares were valued at $18.80 per common share, based on the fair value of the shares on the date of TSX-V acceptance of this transaction.

The Company was considered the acquirer, and Keefe Lake was considered the acquiree in the transaction. Keefe Lake was incorporated in November 2017 and did not constitute an operating business; therefore, the transaction was not accounted for as a business combination under IFRS 3. The consideration paid in excess of net liabilities acquired was expensed to exploration expenditures.

The following table summarizes the consideration paid and the fair value of the identifiable liabilities assumed as of the date of acquisition:

Number of shares issued		152,500
Fair value of shares at acquisition date	$	18.80
Total consideration paid	**$**	**2,867,000**
Assets/Liabilities		-
Total value		**-**
Exploration expenditures	**$**	**2,867,000**

Selected Annual Information

The following financial data are selected information for the Company for the three most recently completed financial years:

	December 31, 2020	December 31, 2019	December 31, 2018
	$	$	$
Current assets	1,731	3,334	159,198

Results of Operations

Six months ended June 30, 2021

In the six months ended June 30, 2021 the Company reported a loss of $72,727 ($0.04 per share). In the same period of 2020, the Company reported a loss of $65,485 ($0.06 per share). Filing and transfer agent fees increased to $12,895 during the first six months of 2021 compared to $6,146 in the same period in 2020, mostly related to the private placement of January 2021. Consulting and management fees were the same in both years at $30,000 and $8,400, respectively. Professional fees were higher due to the private placement at $14,034 in the first half of 2021 compared to $9,141 a year earlier. Interest expense on outstanding loans declined as a result of a loan repayment in February 2021 to $7,326 in the six months ended June 30, 2021 versus interest of $11,714 in the same period of 2020.

Three months ended June 30, 2021

In the three months ended June 30, 2021 the Company reported a loss of $31,405 ($0.02 per share). In the same period of 2020, the Company had a comparable loss of $31,074 ($0.03 per share). Filing and transfer agent fees have increased to $3,645 during the 2021 period compared to $679 in the same period in 2020. Consulting and management fees remained the same at $15,000 and $4,200, respectively, in both 2021 and 2020. Professional fees were consistent at $5,907 in the second quarter of 2021 compared to $5,094 in the same quarter of 2020. The Company incurred interest of $2,616 on outstanding loans in the three months ended June 30, 2021 versus $6,069 in the same period in 2020, the decline resulting from a loan repayment in February 2021.

Liquidity and Capital Resources

As of June 30, 2021, the Company had current assets of $12,016, including cash of $11,079, and had current liabilities of $103,042 resulting in a working capital deficiency of $91,026.

During the six months ended June 30, 2021, operating activities used $145,790 (2020 - $15,501) in cash. The Company had no investing activities in the first half of either 2021 or 2020.

The Company's financing activities in the six months ended June 30, 2021 were financed by a private placement in January 2021 which raised proceeds of $355,200 and an operating loan of $10,000. These funds allowed for repayment of loans totaling $210,000.

The Company is a development stage company with no revenue producing properties and, consequently, does not generate operating income or cash flow. The Company has incurred losses since inception. The Company has relied upon the issuance of equity capital to provide working capital to fund the Company's operations.

Off Balance Sheet Transactions

The Company has no off-balance sheet transactions.

Share Capital

The Company’s issued and outstanding share capital as at the date of this report is as follows:

	Authorized	**Outstanding**
Voting or equity securities issued and outstanding	Unlimited Common Shares	3,725,338 Common Shares
Securities convertible or exercisable into voting or equity securities - warrants exercisable at $0.55 - warrants exercisable at $0.60		 1,850,000 740,000

Related Party Transactions and Balances

Related Party Transactions

Key management compensation for the six months ended June 30, 2021 and 2020 consisted of the following:

- Management fees in the amount of $8,400 (2020 - $8,400) were paid as follows: to a director and officer $2,400 (2020 - $2,400) and a company controlled by a director and officer $6,000 (2020 - $6,000).

Related Party Balances

As of June 30, 2021 and December 31, 2020, $Nil is included in trade and other payables related to these fees.

Loans Payable

On March 29, 2018, the Company entered into a debt modification agreement with Apollo Innovative Solutions Inc. (the "Creditor"). The Creditor agreed to convert its outstanding accounts payable of $190,000 into a note due on July 1, 2019 and the Company hereby agreed to pay the Creditor 10% interest on the outstanding balance, payable on maturity of the note. During March 2019, the Company repaid $45,000 of the principal balance.

On December 31, 2019, the Creditor agreed to convert its outstanding accounts payable of $60,000 into a note, the balance to be added to the existing loan payable of $145,000. The Creditor also agreed to extend the repayment date of the note plus accrued interest of $30,004 to July 1, 2021. The Company agreed to pay the Creditor 10% interest on the outstanding balance, payable on maturity of the note.

The Company determined that the extension of the maturity date on the original loan amount of $145,000 net of the payment of $45,000 paid in 2019 represented a non-substantial modification of financial liabilities under IFRS 9, as the respective differences between the net present value of the cash flows under the modified terms was less than 10 percent different from the net present value from the remaining cash flows of the loan prior to modification, both discounted at the original effective interest rate, resulting in a gain on modification of $4,466 recognized in profit or loss.

The loan as at December 31, 2019 for total principal amount of $205,000 has also been valued at the present value of anticipated future repayments using a discount rate of 10%, which represents the estimated borrowing rate to the Company for a similar loan and anticipated repayment terms. The loan will be accreted to its face value over the term to maturity of the loan at an effective interest rate of approximately 9.70%.

In February 2021, the Company repaid an additional $210,000 against principal and accrued interest.

On July 1, 2021 the Creditor agreed to extend the repayment date of the loan payable and accrued interest totaling $51,750, to July 1, 2022. The Company agreed to pay the Creditor 10% interest on the outstanding balance, payable on maturity of the note.

In addition to the above, debts of the Company in the amount of $7,612 were assigned to an investor on August 19, 2019 and are included in trades and other payables at December 31, 2020. This amount payable is unsecured, non-interest bearing and due on demand and was repaid in February 2021.

Operating loans payable were advanced during the six months ended June 30, 2021 in the amount of $10,000 (year ended December 31, 2020 - $25,000). Receipt of these advances is providing the working capital for the Company to prepare its consolidated financial statements and for corporate registrations.

These loans are unsecured, bear interest at 10% per annum and are due on demand. At June 30, 2021, $41 (December 31, 2020 - $1,474) in accrued interest was included in advances payable.

Financial Instruments

As at June 30, 2021, the Company's financial instruments consist of cash, loans and trade and other payables.

In management's opinion, the Company's carrying values of cash, loans and trade and other payables approximate their fair values due to the immediate or short-term maturity of these instruments.

The Company's financial instruments are exposed to the following risks:

Credit Risk

Currently the Company does not have any material exposure to credit risk. As the Company's policy is to limit cash holdings to instruments issued by major Canadian banks, or investments of equivalent or better quality, the credit risk is considered by management to be negligible.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to pay financial liabilities as they come due. The Company's only liquidity risk from financial instruments is its need to meet trade and other payables and loans payable requirements. The Company tries to achieve this by maintaining sufficient cash to cover current liabilities as they mature. As at June 30, 2021, the Company had a working capital deficiency of $91,026. Liquidity risk is assessed as high.

Price Risk

The Company is not exposed to price risk.

Currency Risk

As at June 30, 2021, the Company's expenditures are predominantly in Canadian dollars, and any future equity raised is expected to be predominantly in Canadian dollars. As a result, the Company does not believe it is exposed to any significant currency risk.

Interest Rate Risk

The Company is exposed to interest rate risk arising from the cash maintained at Canadian financial institutions. The interest rate risk on cash is not considered significant due to its short-term nature and maturity.

Capital Management

The Company's objectives for the management of capital are to safeguard the Company's ability to continue as a going concern, including the preservation of capital, and to achieve reasonable returns on invested cash after satisfying the objective of preserving capital.

The Company considers its capital to be the accounts within shareholders' deficiency. The Company's policy is to maintain sufficient cash balances to cover operating and exploration costs over a reasonable future period. The Company accesses capital markets as necessary and may also acquire additional funds where advantageous circumstances arise.

The Company currently has no externally imposed capital requirements. There have been no changes in the Company's approach to capital management during the year.

Critical Accounting Estimates

The preparation of audited consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities in the consolidated financial statements. The Company constantly evaluates these estimates and assumptions.

The Company bases its estimates and assumptions on the past experience and other factors that are deemed reasonable under the circumstances. This involves varying degrees of judgment and uncertainty, thus the amounts currently reported in the consolidated financial statements could prove to be inaccurate in the future.

New Accounting standards

A number of new standards and amendments to existing standards have been issued by the IASB that are mandatory for accounting periods beginning on or after January 1, 2021, or later periods. The Company has not early adopted these new standards in preparing these consolidated interim financial statements and is currently evaluating the impact, if any, that these standards might have on its financial statements.

Risk Factors

The exploration of mineral deposits involves significant risks, which even a combination of careful evaluation, experience and knowledge may not overcome. Certain of the more immediate factors are discussed as follows:

Exploration, evaluation and development

Mineral exploration, evaluation and development involve a high degree of risk and few properties that are explored are ultimately developed into producing mines. There is no assurance that the Company's mineral exploration and evaluation activities will result in any discoveries of new bodies of commercial ore. There is also no assurance that presently identified mineralization can be mined at a profit. Discovery of mineral deposits is dependent upon a number of factors and significantly influenced by the technical skill of the exploration personnel involved.

The commercial viability of mineral deposits is also dependent upon a number of factors, some of which are beyond the Company's control such as commodity prices, exchange rates, government policies and regulations and environmental protection.

Financing

The Company does not currently have any operations generating cash to fund projected levels of exploration and evaluation activity and associated overhead costs. The Company is therefore dependent upon debt and equity financing to carry out its exploration and evaluation plans. There can be no assurance that such financing will be available to the Company. In the future, the Company will require additional funding to maintain its mineral properties in good standing. The lack of additional financing could result in delay or indefinite postponement of further exploration and possible partial or total loss of the Company's interest in its exploration and evaluation assets.

Commodity price volatility

The market prices for commodities are volatile. The Company does not have any control over such prices or volatility. There is no assurance that if commercial quantities of mineralization are discovered, a profitable market will exist for a production decision to be made or for the ultimate sale of production at a profit. As the Company is currently not in production, no sensitivity analysis for price changes has been provided.

Changes in Internal Controls over Financial Reporting

There have been no changes in the Company's internal control over financial reporting during the six months ended June 30, 2021, that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

Approval

The Board of Directors of Tisdale Resources Corp. has approved the disclosure contained in this MD&A as of August 18, 2021.
